Evergreen Audio 3.0 Updates

Evergreen Audio has announced a number of compelling updates across its whole professional audio metering lineup, as well as a new free meter for prosumers. Trusted by preeminent professionals in music, TV, and film production, Massive Meter Pro and Meter Bridge Pro continue to set the standard for precise and intuitive metering in large, busy studio environments. Meter Bridge Pro enables engineers and mixers to see metering from multiple workstations and sources at a glance.

Bob Brown, creator of Meter Bridge Pro, shared the philosophy behind the update: "We've listened to feedback from our users and made significant improvements to the software to ensure an even better experience for those working under pressure in busy studios and in live stages." This update is available as a free upgrade for existing users, ensuring long-time customers can immediately benefit from the latest advancements.

This launch also coincides with the debut of Evergreen Audio's new website and store, offering an improved design and buying experience.

The Evergreen Audio Lineup

- Massive Meter: Evergreen's flagship offers unparalleled precision and flexibility.
- Massive Meter Pro: Full-featured and designed for Avid Pro Tools DSP based

hardware.
- Meter Bridge: Provides full metering views and control under macOS and iOS.
- Meter Bridge Pro: Professional-grade with extended capabilities. s
- Post Production Metering Suite: Includes 4 licenses for the Massive Meter and 1 license for the Meter Bridge Pro.
- Post Production Metering Suite Pro: Includes 4 licenses for the Massive Meter Pro and 1 license for the Meter Bridge Pro.
- Mini Meter: The latest addition. A free streamlined plugin offering essential metering functionality for prosumers and enthusiasts.

Advanced Features

- Meter Groups: An option to organize meters into groups (e.g., MX, DX, FX) and move them together. One can automatically group meters by name prefix for streamlined workflows.
- Timecode Display: A "Big Timecode Window" and timecode display in the main Meter Bridge window, with support for MTC and offsets for continuous reel playback.
- Deep Pro Tools Integration: Track movements, color, record, solo, and mute status updates are synchronized with associated meters.

Improved Metering Options:

- Added K-12, K-14, K-20, and VU metering.
- Enhanced ballistics for even greater accuracy.

Customisation and Performance Upgrades:

- Organized preferences for faster setup and a new option to specify the number of meters per row in Universe mode.
- Improved meter scaling and a consistent, polished interface.

Pricing

- Mini Meter: Free
- Massive Meter: $99
- Massive Meter Pro: $299
- Meter Bridge (macOS and iOS): Free
- Meter Bridge Pro: $299
- Post Production Metering Suite: $499
- Post Production Metering Suite Pro: $1199
