

AudioControl Bijou Series

AudioControl has introduced the Bijou Series of integrated eARC amplifiers, addressing the growing demand for audio enhancement to support large-screen TVs, micro-LED wall installations, and many other professionally installed entertainment system applications. Combining compact design with state-of-the-art technologies like integrated eARC connectivity, unrivaled GaN amplification, and Dante networking, Bijou amplifiers have been engineered from the ground up to provide professional AV installers with robust, versatile solutions for both new installations and system upgrades, delivering unparalleled sound quality for any space.

Three Bijou models to suit any application:

- The Bijou 2100 2.1-channel amplifier
- The Bijou 3100 3.1-channel amplifier
- The Bijou 5100 5.1-channel amplifier (Dante-enabled for the ultimate in high-performance, multi-zone, scalable, future-ready audio solutions).

They offer the following features:

- **GaN Amplifier:** The Bijou Series incorporates cutting-edge GaN amplifier technology, delivering unprecedented power and efficiency from a compact design, driving even the most demanding speakers to achieve breathtaking sound.
- **eARC Connectivity:** HDMI eARC connectivity is standard on all three Bijou

models, simplifying installation by reducing cable clutter while providing support for Dolby Atmos and DTS, providing jaw-dropping immersive audio experiences combined with the simplicity of operation your client's demand.

- **System Integration:** The Bijou Series is designed with professional installers in mind, offering features like IP control for effortless compatibility with Control4 and other popular control systems, an intuitive web configuration interface, and configurable line outputs for extended system flexibility. Bijou amplifiers can be easily integrated into any setup, making them versatile solutions for both new installations and system upgrades.

A Perfect Fit for Every Project: The Bijou Series' compact, cool-running design allows these amplifiers to fit seamlessly into any environment, delivering exceptional audio quality without compromising room aesthetics. With a low-profile 1U half-rack form factor and convenient mounting options, these unobtrusive solutions can be installed anywhere—even behind TVs. And with convenient mounting options, integrators are able to deliver elevated audio experiences virtually anywhere.

The AudioControl Bijou Series will become available January, 2025.
