# New Audiomovers LISTENTO Features

Audiomovers (booth 15908) is raising the bar in remote collaboration with a new suite of features for its flagship software, LISTENTO. This latest update to the LISTENTO desktop application, available as a public beta version in the first quarter of 2025 boasts multiple new features for audio professionals. Users can enjoy an updated channel count: they will be able to stream and receive up to 128 channels of lossless audio simultaneously and receive up to four different LISTENTO streams from different transmitters in the application's receiver at once (with the combined channel count capped at 128).

Audiomovers unveils New Features for LISTENTO

Thursday, 23 January 2025 20:35

Users will also be able to utilize the new Local Video File Player, enabling them to sync local video files to incoming LISTENTO streams to review audio to picture remotely in real time (perfect for composers and music editors working in film and TV). With the new A/B/C/D File Player, users can also play back four audio files simultaneously and transmit them through LISTENTO. The four files will play in sync and can be selected for playback by the Transmitter to A/B/C/D. New Talkback and Listen Back functionality will also be available as part of the release. Additionally, users will be able to share the ability to stream with their collaborators through a simple invitation system. The updates further reinforce LISTENTO as the go-to solution for professionals seeking reliable, high-quality remote workflows for music production, mixing and post-production.

"LISTENTO has been instrumental in transforming how music professionals connect and collaborate, enabling seamless audio streaming and real-time interaction across the globe," stated Audiomovers General Manager Dom Dronska. "With these new features, we're not just enhancing the platform, but pushing the boundaries of what's possible in remote audio production, ensuring creators have the tools they need to innovate and thrive in an increasingly digital and interconnected music industry."

Audiomovers LISTENTO is a versatile audio streaming plugin and service enabling seamless real-time collaboration. It streams high-quality audio from any DAW, supports Dolby Atmos, and offers adjustable latency for smooth workflows. With lossless multichannel support, robust security, and no signup required for listeners, LISTENTO is a powerful, scalable tool for professionals on macOS and Windows.

The LISTENTO update will be available as a public beta version in the first quarter of 2025. Increased channel count, talk back, stream control and multi- stream reception are available to LISTENTO PRO subscribers, with the rest available to all. LISTENTO Pro is subscription-only and retails for $199.99/year. LISTENTO Basic is also subscription-only, retailing at $99.99/year. Visit PMC and Audiomovers booth (15908) at NAMM for a private preview.
