

### BluOS updates Drivers

BluOS, the original hi-res multi-room audio ecosystem, participates again at Integrated Systems Europe (ISE) 2025, the world's largest exhibition for AV and systems integration professionals. Attendees can experience BluOS at several locations at the show, including at the stands of Monitor Audio (#2G300) and L-Acoustics (#2F150), and the most comprehensive experience available being at the Lenbrook Hi-Res Audio Solutions stand (#2H700) where it will power the interactive multi-zone demonstrations for NAD Electronics, PSB Speakers, Bluesound, and Bluesound Professional.

Additionally, in time for the show, BluOS has released a series of driver updates aimed at integrators' needs:

- **Control4:** BluOS has been recertified by Control4, a leading automation system for homes and businesses seeking unified control of lighting, audio, video, climate control, intercom, and security devices. Latest driver, 3.4.2, includes new parameters for zone and mini drivers, and player discovery, as well as new "Play All" functionality for playlists and albums.
- **Crestron:** Attendees can preview a new user interface for using BluOS via Crestron that features an elevated user experience. Created by their third party app partner, Ultimation, this UI will become available for purchase from the Ultimation website.
- **NICE:** The latest version of the NICE driver, 1.8.4, has added support for the latest products from Bluesound, NAD Electronics, and Bluesound

## BluOS updates Drivers for Residential and Commercial Integrators
