

New professional AES & DMX cable drums from Klotz

Double shielded digital cable drums with XLR 3p. by Neutrik

Klotz AES3N2YSD

The double-shielded AES3N digital cable drums have been optimised for AES/EBU and DMX signals and are the optimal solution for live events. Compact in size and light in weight. The cable drum is made of break-proof plastic and is equipped with a locking brake. KLOTZ uses high-quality, black chromed XLR 3p plugs with protective caps as plug connectors. The XLR male cable end is available on the outside of the reel core in sufficient length and both cable ends are provided with transparent shrink tubes for free labelling.

KLOTZ uses the flexible OT206 digital cable with a conductor cross-section of 0.22 mm² and a choice of black PVC or blue PUR outer jacket. The double shielding via AL/PET foil and additional braided shielding ensures interference-free transmission of the digital signals even over long distances - of course, as always, "Made in Germany" with the 6-fold KLOTZ quality control according to ISO 9001:2015.
