

KV2 Audio ESD8

The ESD range of two-way and three-way passive loudspeakers from KV2 offers a wide variety of loudspeaker solutions ranging from the ultra-compact ESD Cube, ideal for peripheral reinforcement in bars, theatres, clubs, houses of worship, museums etc., right through to the powerful ESD15 and ESD36. ESD15 is capable of acting as a standalone PA/monitor system due to its excellent bass response, whilst the ESD36 has found favour with AV rental and production companies as well as for the theatre and worship market as a powerful, full-range solution with excellent vocal intelligibility in a compact format. KV2 is pleased to extend the range with the

addition of the ESD8, which slots neatly into the range between the existing ESD6 and ESD10.

As its name suggests, the ESD8 is a compact passive 2-way, high output full-range loudspeaker incorporating an 8" trans-coil woofer and a 1" compression driver coupled to a wide dispersion horn. Presented conservatively like the rest of the range in a unique angled low-profile Baltic birch enclosure and designed to present exceptional speech and music definition, the ESD8 provides a smooth hi fidelity response and delivers a natural sound quality and level that is superior to many larger competing products.

Ideal as a main system speaker or as an in-fill for larger systems, the flexible ESD8 can be applied quickly and efficiently on podiums, stands or suspended. Applications range from corporate presentations and functions to infill, close monitoring or installation. Combined with subwoofers – of which there are four to choose from in the ESD range – ESD8 offers high quality full range performance.
