Exploring a Diverse Array of Audio Tools and Techniques in Two-Day Event

Modern music production marries time-proven techniques with those enabled by new technologies to produce today's hottest hits. Recording artist, producer, educator and Audio Engineering Society Governor Paul "Willie Green" Womack will host a diverse array of the music industry's brightest up-and-coming engineers and producers, leading technological innovators and seasoned professionals for two packed days of illuminating insights into cutting-edge production practices in the AES Music Production Academy, taking place online April 20 - 21. Priced at just \$25 for AES Members / \$49 for non-members, the AES Music Production Academy will cover topics ranging from vocals to vinyl, offer inside takes on high-profile sessions, and investigate deliverables and good business practices, with additional presentations from event partners Eventide and Sonarworks.
