

Apogee BOOM

Apogee announces the new BOOM. BOOM is made for passionate creators that pursue their creativity and quality without compromise. Whether you're a musician, podcaster, video producer or live streamer, BOOM will inspire you to take your projects to the next level, with legendary studio-quality sound by Apogee.

With BOOM, you can record, monitor and mix through class-leading mic preamps and pristine digital conversion, fine tune your input sources using BOOM's built-in hardware DSP FX, and take your studio anywhere your story takes you. All you have to do is connect directly to your Mac, iPad Pro or Windows laptop, and let your ideas flow.

From recording guitars, to vocals, to synthesizers, BOOM will capture every nuance of your performance. You shouldn't sacrifice anything when it comes to your music, especially sound quality. BOOM features built-in hardware DSP and the Symphony ECS Channel strip to dial in the perfect sound while you record with zero effects latency.

Whether you are recording your first podcast episode in your bedroom or traveling to capture your 200th show, BOOM is the perfect solution for telling your story with unrivaled sound clarity and has enough gain to drive popular content creation microphones like the Shure SM7B. Let your voice be heard and never leave your chat hanging with poor audio quality. Create your own production studio with BOOM's mixer, on-board DSP processing and Loopback mode. Having a great microphone is only half the solution, let BOOM do the rest.

For almost four decades, Apogee has been perfecting the art of analog recording in a digital world. BOOM continues that legacy by focusing on the details and premium audio components - allowing your projects to stand out from the rest.

- BOOM's conversion stages employ high-end analog to digital and digital to

Apogee launches BOOM USB-C Audio Interface

Friday, 16 September 2022 09:39

- analog components, not low-end codecs.
- All inputs accept a professional-spec maximum input level of +18dBu, ensuring a pristine audio signal even with the loudest sources.
- Mic preamps offer a class-leading 62 dB of gain, for capturing delicate sources with clarity.
- BOOM's zero-ohm headphone output provides an audiophile experience, able to drive even high-impedance "hi-fi" headphones with power, clarity and a perfectly balanced frequency response

BOOM is the first audio interface in its class to offer on-board hardware DSP. With the Symphony ECS Channel Strip (tuned by legendary mixer, Bob Clearmountain), you can sculpt your input sources with a 3-band EQ, compression and a drive knob that adds the warmth and grit of analog gear.

Create the perfect live streaming production with the on-board Mixer and Loopback mode. Allowing you to listen to your game, Spotify playlist, & chat notifications all at the same time and at the perfect level. BOOM comes with 2 Inputs and 2 outputs. Connect your mic and guitar, or synth to your inputs on the front and your speakers or headphones to your outputs on the back.

BOOM is compatible with any iOS device, making it an ultra-portable solution for content creation on the go with your iPad Pro. Touch control of the ECS channel strip makes it easy to dial in a great sound. Connection to Lightning devices requires Apple Camera Connection kit and a powered external USB Hub. BOOM's compact and rugged design make it the perfect partner in crime for capturing content anywhere. Built with a steel casing and rubber pads along the base, BOOM is sure to stand the test of time. Simply plug BOOM in with the included USB C cable to get started. No external power supply needed.

Bundled with BOOM is Ableton Live Lite, which is a fresh and easy way to write, record, produce and perform your own music. It includes essential workflows, instruments and effects for creating new sounds, recording ideas, performing on stage and much more.

What's in the Box

- Apogee BOOM
- USB-C Cable with included USB-C to USB-A adapter

Included Software

- Ableton Live Lite - Requires registration
- Apogee Control 2 - macOS and Windows
- Apogee Control 2 - iOS - download from the Apple AppStore
- Apogee Soft Limit Plugin - Requires registration

System Requirements

Apogee launches BOOM USB-C Audio Interface

Friday, 16 September 2022 09:39

- macOS 10.14.6 or greater
- iOS 13 or later
- Windows 10 Anniversary update or later
- Mac & Windows: 4 GB min. RAM, 8 GB Recommended
