

Arturia FX Collection 4

FX Collection 4 now includes 30 effects, from pivotal digital reverbs to cutting-edge multi-engine distortion, along with over 1000 expertly-designed presets, improved accessibility features, and a number of useful enhancements for fluid DAW production.

A curated suite of creative audio effects for modern music makers, FX Collection 4 is guided by Arturia's decades of passion for sound exploration, it unites upgraded recreations of iconic era-defining studio tools with contemporary & experimental effects plugins in a single collection - to both enhance and inspire as part of the creative process.

What's new:

- Rotary CLS-222: Move from silky smooth stereo swirls to spinning synchronized patterns with a modernized take on the classic Leslie rotary speaker emulator.
- Dist COLDFIRE: A dual-engine distortion effect that goes from rich tube saturation to unrestrained sonic destruction in a few clicks.
- Filter MS-20: Pump destructive crunch and roaring stereo filter sweeps into

Arturia introduces FX Collection 4 with new plugins & upgrades

Thursday, 01 June 2023 17:05

your mixes with this infamously abrasive KORG filter & distortion module.

- Rev LX-24: An upgraded version of the retro box that defined '80s reverb; real-feeling space, cave depth atmosphere, and subtly-sparkling textures await.

Product & performance updates

- Bus FORCE adds overdrive gain compensation.
- Efx FRAGMENTS gets 40 new presets and an updated modulation workflow.
- Rev LX-24 can now be resized for more compact screen presence.
- Bus FORCE and Rev SPRING-636 now both have oversampling quality options.
- Upgraded accessibility features, with real-time text-to-speech feedback.
- NKS VST3 and Mac M1 AAX support.
- A number of bug fixes & optimizations.
