

Arturia Pigments 4

Pigments 4 is a softsynth VST with the power to create any sound, from the best mix-ready modern presets to deep custom sound design. Explore every shade of synthesis and make your wildest sonic fantasy a full-color reality, whatever your style.

With enhancements to practically every single module, Pigments 4 is a free update that lets you discover your own wavelengths on an infinite spectrum of sound - redefined, optimized, and unleashed. Here's what's new:

- A refreshed graphical interface, a simplified Play Mode, and a higher-contrast Light Mode.
- Quick drag-and-drop modulation editing, LFO waveform presets, ODDSound MTS-ESP microtuning compatibility, and more.
- Wavetable engine ring mod, extra Harmonic engine phase options, and streamlined Unison controls.
- Introducing the MS-20 Filter, Shimmer Reverb, Super Unison, and improvements to a number of existing effects & filters.
- Discover a huge selection of new factory presets, wavetables, samples, and noise types.

Arturia introduces Pigments 4

Tuesday, 13 December 2022 17:01

Free for new users, and available at a discount for registered Pigments owners, this exclusive selection of sounds explores the bold, colorful, exploratory sounds of Pigments 4. Each bank includes 150 presets, available now on the Arturia Sound Store.

- Wavelengths Lo-fi: The chilliest beatmaking palette you've never heard - Uncover retro color and soothing shades of sound on a whole new spectrum, courtesy of Pigments 4.
- Wavelengths Neuro Bass: Deeper & darker frequencies that hit different - 150 presets designed to reach new levels of crushed, gnarled, earth-shaking bass making use of the engine, filter, and FX enhancements in Pigments 4.
- Wavelengths Cinematic: New shades of ambience and impact alike - Set your scene and tell your story through sound with 150 evocative and powerful presets for contemporary film score and library composition.

Celebrate the launch of Pigments 4 with generous introductory offers and exclusive sounds for new and existing users alike. This update is free of charge. Plus get the exclusive Wavelengths Bundle with 3 new sound banks for 19.90€/€ (worth 89.97€/€), or 9.90€/€ individually (worth 29.99€/€), for a limited time. The latest version is available to buy at 99€/€ (worth 199€/€), with the Wavelengths Bundle included at no additional cost. Registered Arturia customers will be eligible for a personal introductory offer, and can simply login to redeem. Intro offers end on January 4th, 2023.
