

Arturia MiniFuse Recording Pack

Record, produce, and perfect any sound with an all-in-one package that ticks all the creative boxes. The MiniFuse Recording Pack combines a next-level audio & MIDI interface with the accessories and software that producers need to make their sound happen. Time to plug in, get creative, and enjoy making music.

What's included?

- MiniFuse 2, a 2-in/2-out audio & MIDI interface
- CM1 cardioid microphone with shockmount & pop filter
- EF1 closed-back monitoring headphones with adapter
- 3m XLR cable
- 6 premium music-making software titles

MiniFuse 2 features 2 audio inputs & outputs, MIDI for connecting synths & drum machines, and easy to use controls that work right out the box. Capture voice & instrument recordings with supreme clarity without hassle with the included CM1 cardioid microphone - it even comes with a shockmount & pop filter to keep recordings clean & noise-free. Monitor any mix in studio-grade detail and comfortably smash out long sessions with the included EF1 closed-back monitoring headphones, great for home production and live recording. All the software & sounds needed to freely explore music production and create inspiring tracks; from an introduction to an industry-standard DAW to a range of creative effects and audio enhancing tools:
