

Arturia MiniFuse Update 1.5

Users will be able to get the most out of their MiniFuse 1 and MiniFuse 2 audio interfaces with expanded streaming and creative recording capabilities. MiniFuse update 1.5 adds new virtual input and output channels and a low-latency mixer for easy “loopback” recording.

What’s new?

- **Capture Audio During Gameplay:** Combine and stream your voice and game audio seamlessly. MiniFuse update 1.5 lets you record high-quality multi-channel streams without the need for a complicated setup.
- **Record Crystal-Clear Zoom Conversations:** Capture both sides of your Zoom or video call conversations with ease, perfect for podcasts or interviews.
- **Sample from YouTube and More:** Sample sounds directly from YouTube or any system audio into your DAW for creative production techniques.
