

Arturia MiniLab 3

MiniLab 3 is a next-generation plug-and-play MIDI controller that combines a great-feeling keyboard, flexible pads, faders, and knobs, and a premium software bundle with seamless DAW integration that lets users get creative right out the box.

From the great-feeling keyboard, to the pads & faders directly integrated with Analog Lab & your DAW, to the real-time mini display, every aspect of MiniLab 3 is designed to be intuitive, expressive, and a joy to use - for beginners and pros alike. Enjoy a workflow that aids the creative process, with features like a built-in

Arturia unveils revamped next-generation MiniLab 3 MIDI controller

Friday, 21 October 2022 16:00

arpeggiator, Chord mode, custom DAW presets, and easy transposition. Making music has never been so accessible. MiniLab 3 is built to fit seamlessly into any setup, from bedroom to stage, with its compact & lightweight design, MIDI output, and USB-C connectivity. It even has custom scripts for DAW integration with Ableton Live, FL Studio, Logic, Bitwig, and Reason.

On top of a world-class MIDI controller, users get a full package of premium music-making software, from an industry-standard DAW to well over 500 synth & keyboard presets:

- Analog Lab Intro
- Ableton Live Lite
- UVI Model D
- Native Instruments The Gentleman
- Loopcloud sample packs & subscription
- Melodics subscription

MiniLab 3 is built with longevity and sustainability in mind. A reliable & rugged design with better components means this controller goes the distance, complete with a 5-year warranty. And with minimum 50% recycled plastic, less waste production, and 100% recyclable packaging, MiniLab 3 is helping reduce our carbon footprint.
