

Arturia reignites Fuse line-up with firmware updates, added software titles

Arturia is enhancing the AudioFuse range's unrivalled sound quality and workflow with a free firmware update, as well as two exciting new FX for AudioFuse Creative Suite.

- MacOS Big Sur compatibility
- Refined analog signal path
- ADAT compatibility improvements
- Refined clock performance
- Minor bug fixes

AudioFuse Creative Suite has been expanded to 10 software instruments & effects for effortless music creation - and it comes with every Fuse interface.

10 professional titles, from circuit-accurate classic preamp emulations to cutting-edge softsynth presets - now including the new Phaser BI-TRON & Chorus JUN-6 modulation effects.

All AudioFuse users can login and download Firmware now to unlock the latest

Arturia updates the AudioFuse range

Wednesday, 27 January 2021 15:22

features, free of charge.

Phaser BI-TRON & Chorus JUN-6 have been added to the accounts of all registered AudioFuse interface owners, and can be downloaded directly from Arturia Software Center.
