

Audiomovers New Year Collection

Today, Audiomovers launches the ‘New Year Collection’, containing six new bundles, covering different audio production workflows with a focus on immersive content production.

Dominika Dronska, Ops Director of Audiomovers, commented, “After a successful 2023 where we delivered a portfolio of ground-breaking immersive production tools, we wanted to present packs designed around particular working scenarios; multi-room studios, mixing for Apple Music, monitoring, routing and sharing Dolby Atmos content, as well as recording and production workflows. We are focused on serving the needs of our loyal base, and continuing to innovate to super-charge audio professionals.”
