

Austrian Audio Hi-X20

Austrian Audio announces the Hi-X20 – the latest entry in the brand’s family of professional, closed-back headphones. Designed to offer detailed, high-precision sound in a compact, affordable package built for audio professionals, content creators, and discerning music lovers alike, Hi-X20 is the ideal, day-to-day workhorse for recording, mixing, and recreational listening. Hi-X20 is available now

for \$149.

The Hi-X20 is a professional tool designed to meet the demanding needs of audio professionals and enthusiasts alike. Whether you are in the studio, in front of a mic, or simply enjoying your favorite tracks, the Hi-X20 delivers unparalleled performance and comfort. Designed based on customer feedback and using the same proprietary Hi-X Drivers that power all Austrian Audio professional headphones, the Hi-X20 offers high-precision sound that is perfectly balanced in middle and high frequencies with a powerful, but not overdrawn bass-response. The result is a fresh take on the Austrian Audio sonic signature – pristine sound, honest frequency response, fast transients, and minimal distortion in the bass range.

Beneath its sleek black and red aesthetic, the Hi-X20 is built to last, with metal hinges and a metal headband. Its foldable design allows for easy storage and transport in a rucksack or bag. Smooth, memory foam padding grants for years of reliable, comfortable listening. Featuring a long, detachable 3 meter cable, the Hi-X20 is perfect for professionals who need flexibility in their workspace. “The development of Hi-X20 was very much a collaborative effort with our customers who offered us thoughtful feedback,” said Austrian Audio CEO Martin Seidl. “The result is a different tuning and a fresh look that will appeal perfectly to audio professionals and musicians.”
