

Baby Audio BA-1 Expansion Packs

Baby Audio launches 4 new Expansion Packs for BA-1. They give you style-specific presets for our first ever synth, created by industry leading sound designers. From the sleek sounds of City Pop to the raw origins of electro, these virtual cartridges will take BA-1 - and your tracks - to new sonic territory. Each pack includes 64 meticulously crafted presets for BA-1.

For Neon Black Baby Audio has teamed up with film composer The Unfinished / Matt Bowdler to create Neon Black: A dark 'retro synth score' expansion pack reminiscent of John Carpenter soundtracks, haunted mansions and eerie VFX. If you need some 1980s horror movie magic in your productions - with a modern twist - this is your gateway.

City Pop Vol. 1 is arguably, no one mastered Japanese 80s synths better than the Japanese producers themselves. So we teamed up with the brilliant Ryuichiro Yamaki to create City Pop Vol. 1 and 2. Sleek, colorful and stylish, City Pop Vol. 1 will transport your tracks back to the dreamy metropolis that was Tokyo in the 1980s.

In City Pop Vol. 2, Ryuichiro Yamaki explores the origins of JPOP and Kawaii, giving you bright and bubbly sounds with no further processing needed. No matter your style of music, these patches will cut through the mix and pop right out of your speakers. If you make any kind of pop music, this is a must.

Remember your first encounter with 'the synthesizer'? That strange and otherworldly sound? Electro Elixir is inspired by that moment of wonder. It uses BA-1 as a vessel for exploring the roots of synth pop and electro. With one foot in a Kraftwerk universe, and the other in the future, Electro Elixir brings you pure

Baby Audio releases BA-1 Expansion Packs
