

Sonuscore Horizon Leads

Best Service announces Horizon Leads, a cinematic scoring synth from mastermind Tobias Menguser. This cutting-edge instrument flawlessly merges synthesizers with the iconic aesthetics of Hollywood scoring, unlocking a whole new sonic realm. Born from the desire to fill the void in authentic cinematic soundtrack synthesizer sounds, Horizon Leads caters to the rising demand for top-notch, expressive synth tones used by elite Hollywood composers in blockbuster productions like Blade Runner 2049, Dune, and Interstellar.

Dive into 150 animated themes featuring pulses, textures, and arpeggios, all powered by the renowned ensemble engine. Horizon Leads boasts a diverse palette of 80 freely playable synth instruments, giving you the liberty to sculpt your sonic landscape. From ethereal sounds to commanding leads, you're in control. Immerse yourself in the next frontier of cinematic scoring with Horizon Leads.

Key Features

- Meticulously sampled synthesizer sounds treated like acoustic instruments
- Hollywood scoring aesthetic for true cinematic impact
- Designed by renown sound designer Tobias Menguser
- Built from the same engine as Elysion with a modified Ensemble Engine, the Motion Engine, and the Pan Engine
- Familiar and intuitive user interface known from Elysion and The Orchestra
- 150 complex animated and fully customizable themes, featuring up to 4 fully controllable instruments
- 80 instantly playable bass-heavy instruments
- MIDI-Export: Unleash the power of the ensemble engine onto your personal template
