

bluebox Eurorack Edition

1010music introduces bluebox Eurorack Edition, the new Eurorack mixer with effects and multichannel recording/playback based on the award-winning bluebox desktop mixer. Plus the Eurorack mixer adds new features like USB-C ports for connecting external MIDI controllers and sending 2 channels of audio to your computer. Whether recording your Eurorack jams; using it to play stems as backing tracks; or a combination of both.

bluebox Eurorack Edition is the elegant way to get high-quality mixing, effects and integrated recording and playback all in one super-optimized 30 hp form factor. Like all 1010music products, it uses a touchscreen with knobs to let you quickly control volume, gain, 4 band parametric EQ, pan, reverb and delay effects, mute/solo and record/play functions for each track – all with a fast, fluid, intuitive workflow.

Easily map the 3.5 mm TS inputs to 12 mono tracks or 6 stereo tracks – all with independent control for recording and playback. Connect your gear to bluebox Eurorack Edition, and route each track independently to outputs and effects sends for even more variety. Record independent tracks or the Main mix to a standard microSD card or send/receive audio to your computer via USB-C.

bluebox Eurorack Edition is the ultimate in compact mixing/effects/recording/playback for Eurorack. Smack it in your rack and hit the road with a self-contained, electronic music powerhouse.

bluebox Eurorack Edition Features

- Mix 12 mono/6 stereo tracks of live or prerecorded sound.
- Independently route each track to any combination of outputs:
 - 4 mono / 2 stereo outputs
 - Stereo headphone output
