

FSK Audio ModPlay

FSK Audio, designers of innovative audio plug-ins and utilities, announces its debut at The NAMM Show 2025 at booth #14116, located near the Pro Audio lounge. This exciting exhibition marks a significant milestone for the company as they introduce their debut offering, ModPlay, a revolutionary MIDI plug-in designed to inspire creativity and streamline music production workflows, coming out in Spring 2025.

"We're a small team of engineers who are also musicians with decades of experience creating intuitive tools for creatives," said Kosta Cross, CEO of FSK Audio. "We're on a mission to inspire creativity by helping producers, musicians,

and engineers save time, reduce complexity, and explore new creative possibilities," Creatives today face high demands, including expensive hardware, time-consuming workflows, and clunky software. FSK Audio addresses these challenges with affordable, intuitive, and inspiring solutions that streamline creativity through innovative, automated workflows and groundbreaking design.

"Workarounds shouldn't dictate your workflow," says Chief Product Officer Dice Naito. "FSK Audio's tools simplify production, enabling users to explore new creative frontiers." From music production to post-production and live performance, FSK's solutions remove technical hurdles for producers, engineers, and musicians, allowing them to focus on crafting exceptional music and sound.

The ModPlay plug-in introduces advanced MIDI modulation capabilities that enable musicians and sound designers to add movement, expression, and personality to their audio productions. Designed with intuitive workflows and accessibility in mind, ModPlay offers:

- Interactive LFO waveshapes designed for speedy results and to make modulation accessible and intuitive for users of all experience levels. Whether you're new to sound design or just looking for quick, creative solutions, ModPlay lowers the barrier to entry, allowing anyone to animate and customize modulation effortlessly.
- Unique real-time playability: ModPlay allows you to switch between 12 settings instantly using a MIDI keyboard, making it a dynamic and interactive tool for seamless sound design.
- Randomize Presets & Waveshapes, giving users access to endless possibilities for sonic exploration.
- Up to 4 MIDI-assignable destinations with intuitive mapping options.
- Compatibility with all major formats, including AAX, VST3, and AU.
- Effortless DAW tempo synchronization for seamless, musical results.

Whether triggering transitions in a live performance, animating sounds for post-production, or composing evolving and creative soundscapes, ModPlay provides an accessible way to enhance creativity without expensive hardware or clunky workflows. "With ModPlay, we're providing an intuitive, versatile solution that empowers users to explore movement, automation, and sound design like never before - whether you're in the studio, performing live, or working in post-production," states Naito.

At The NAMM Show 2025, FSK Audio invites attendees to experience ModPlay with live demos, hands-on interaction, and exclusive early access offers. Visit booth #14116 near the Pro Audio Lounge to explore how FSK's tools save time, reduce complexity, and spark creativity in music production and sound design.
