

inouï samples “Sweet Acoustic Textures - Viola” for Kontakt

Viola is both a traditional virtual instrument and a random acoustic textures generator. It features a selection of 15 classic, less common and unheard playing techniques such as harmonic bisbigliando, flautando sul ponticello and much more.

The 2904 selected samples were recorded on a 1941 Ernest Ledler viola with an italica backplate in short and neutral acoustics, without any concession choosing the gears, then treated with the greatest care in the respect of the instrument tone.

Sweet Acoustic Textures - Viola is designed for composers and producers who are looking for the warm tone of viola or looking to create unheard acoustic textures.

Features

- Musician: Camille-Raphaël BÉRARD
- Viola: 42.5cm - 1941 - Ernest Ledler with italica backplate
- 2904 samples

- 48kHz / 24 bits
- PrismSound Titan preamplifiers and converters
- Recorded at Caverne Studio, Paris, France

3 microphone positions:

- close subcardioid large diaphragm tube (Flea 49 Next)
- close ribbon (Royer R122)
- semi proximity omnidirectional short diaphragm couple (Sennheiser MKH8020 x2)

15 techniques:

- Pizzicato
 - Col Legno Battuto
 - Spiccato
 - Ricochet
 - Swell
 - Long
 - Fast Détaché
 - Tremolo
 - Bisbigliando
 - Harmonic Bisbigliando
 - Col Legno Tratto
 - Flautando
 - Flautando Sul Ponticello
 - minor Trill
 - Major Trill
-
- Up to 9 round robin
 - Up to 4 velocity layers
 - dynamics goes from ppp to mf, we did not record f or ff
 - A classic mode allowing to play up to 6 techniques of your choice using keyswitches
 - A random texture generation mode with, for each of the 6 techniques of user's choice, a control of:
 - the event density
 - their volume
 - the velocity range
 - spatialization of events via an XY pad
 - 18 presets
 - The ability to link volume, velocity and density controls
 - The ability of activating, deactivating and reset round robins
 - The control of the attack and the release
 - The ability to automatically route techniques or microphones on separate channels

inouï samples releases “Sweet Acoustic Textures - Viola” for Kontakt

Wednesday, 02 February 2022 07:00

System requirements

- Requires the full version of Kontakt 5.8.1 (or Kontakt 6)
- Size: from 0.60Gb to 1.75Gb
