

IsoAcoustics mobile app

IsoAcoustics announces the launch of the IsoAcoustics mobile app which helps customers find the perfect isolation products for their audio equipment.

With the Product Selector Wizard included in the IsoAcoustics mobile app, finding the perfect IsoAcoustics product for your audio equipment has never been easier.

IsoAcoustics launches IsoAcoustics mobile app for easy solution finding

Tuesday, 17 January 2023 15:45

The app offers eight categories: studio monitors, pro ceiling/wall speakers, subwoofers, guitar amps, floor standing speakers, other speaker types, hifi components, and turntables. Customers can choose their make and model from a comprehensive list of over 5,000 entries covering the most popular models on the market and even discontinued products. Should the model not be listed in the database, users just click "other" to provide some data about the speaker or component, and the Wizard will make a recommendation on that basis. Apart from recommendations, the app also explains the benefits of each solution and specifies thread size and required adapters, if applicable. With this helpful tool, customers can be confident that they are choosing the best isolation products for their audio equipment.

In order to help customers find the ideal products for their applications, the IsoAcoustics app provides detailed specifications as well as explanations of IsoAcoustics patented technology and product features. Customers learn everything they need to know about IsoAcoustics to make informed decisions. The app also keeps users up to date with the latest news from the company, including new product launches, giveaways, and upcoming shows. With the mobile app, people can stay connected with IsoAcoustics and be the first to know about exciting new developments.

The IsoAcoustics mobile app is a valuable resource for everyone who is looking for high-quality audio isolation products from IsoAcoustics. The Inquiry feature allows users to get help directly from the IsoAcoustics team. Whether for more detailed product recommendations, technical support, or just to learn more about IsoAcoustics, the team is happy to assist.

The free IsoAcoustics mobile app is available immediately [under this link](#) from the App Store for iOS and the Google Play Store for Android.
