

### Moog Music Moogerfooger for iOS

Moog Music, a pioneer in the world of electronic musical instruments, is making the Moog sound even more accessible by bringing its collection of Moogerfooger plug-ins to iOS. All eight dynamic effects are now available in the App Store. Moogerfooger Effects Plug-ins bring the unmistakable warmth and character of Moog's analog signal processing to your favorite DAW. These sound design tools faithfully replicate the unique qualities of the coveted original Moogerfooger hardware effects, offering a wide range of new and flexible creative possibilities.

Released as desktop plug-ins by Moog last fall, all seven reimaginings of the original hardware pedals plus the novel MF-109S Saturator have been used by artists to transform the sounds of their productions across genres and styles. Now, in response to requests from Moog plug-in users and the greater creative community, musicians and producers can enjoy the iconic sound and versatility of these legendary effects processors on their iPhones and iPads.

Over the years, music production technology has advanced to redefine the way musicians create, record, and produce music. With today's powerful smartphones and tablets, artists now have on-the-go access to instruments and technologies once limited to professional recording studios - all from a single mobile device. As a result, mobile music production has sparked a new wave of creative artists who are realizing their musical visions outside of traditional studio settings.
