

Native Instruments Claire

Native Instruments today released Claire, a stunning new addition to its line of virtual instruments, capturing the pristine tonal clarity of a world-class 10-foot Italian concert grand piano. Created in collaboration with Galaxy Instruments, Claire offers composers, producers, and musicians a deeply immersive playing experience, meticulously sampled to deliver an unparalleled sound.

Building on the acclaimed Noire engine, Claire delivers a harmonically rich sound, flowing from deep, resonant basses to clear, shimmering overtones. Whether you're sketching pop ballads or shaping grand cinematic scores, Claire invites you to enjoy each step of the creative process, where every note is full of possibility. Claire's source is a masterfully crafted Italian concert grand piano, celebrated for its tonal clarity and deep, cutting bass. Equipped with a rare fourth pedal, this piano provides nuanced control over volume and timbre, ideal for creating subtle, expressive tones without sacrificing depth.

Recorded at the acclaimed Galaxy Hall, Claire offers both close and room microphone setups, which can be seamlessly blended to create anything from intimate tones to expansive ambience. Further shape your sound with color, tonal shift, depth, and richness controls, dialing in mechanical and pedal noises for an authentic performance. A signature feature from Noire, the Particles engine in Claire introduces layers of evolving harmonics and subtle rhythmic textures, responding
