Nomad Factory British Bundle v2

Nomad Factory announces the release of the British Bundle v2, marking the first offering in the new "Classic Series." This updated bundle replaces the original British Bundle and includes the same renowned plugins, now enhanced for modern compatibility and performance. An introductory promo is actually running on the British Bundle at $29 (LIST $179) through authorized retailers worldwide and at $35 from the Nomad Factory website. Individual Plugins are Now available as British

MCL-2269 and British NEQ-1972 at $129 LIST and $29 intro price through authorized retailers worldwide and at $25 from the Nomad Factory website.

British Bundle v2 Highlights:

- Modern Compatibility: Upgraded for the latest OS systems, including Apple Silicon and VST 3 support.
- Enhanced GUI: Redesigned with retina-ready resolution for a clearer user experience.

The original British Bundle has been discontinued and replaced by the British Bundle v2. This new bundle includes upgraded versions of the classic plugins to ensure compatibility with the latest operating systems and standards. The British Bundle v2 is the inaugural release in the Nomad Factory "Classic Series." These plugins are identical to those in the "Original Series" but have been enhanced to support modern OS systems, Apple Silicon, and VST 3. The graphical user interfaces have been upscaled and redesigned with retina-ready resolution, providing a clearer and more engaging user experience. The two plugins in the bundle are now sold individually under the names British MCL-2269 and British NEQ-1972. These plugins are inspired by the famous British 2254 Master Compressor Limiter and the Classic British 1081 EQ Module, respectively.
