

SONICWARE LIVEN Texture Lab & SmpITrek 2.0

After the successful LIVEN Lofi-12, the Japanese manufacturer Sonicware presents another new creative machine at the Superbooth 2023: LIVEN Texture Lab. The granular processor can synthesize completely new sounds by splitting, altering and reassembling any kind of source sound. Users can get a first impression of the new LIVEN member at SUPERBOOTH in Berlin May 11 - 13, 2023 at booth W317.

Features:

Thursday, 11 May 2023 10:05

- Synthesizes completely new sounds by splitting, altering and reassembling any kind of source sound
- Useable as a synthesizer and as an effect processor
- Sublime Shimmer reverb
- 128-step sequencer
- 16 pattern presets from well-known sound designers
- Built-in speaker and battery power

Customers can get a discount of 40,00 € with the Promo Code "SonicwareEurope". This can be redeemed in participating dealer stores or at the website below on any Sonicware product (except power supplies). The promo ends on July 14, 2023.

Added to the Liven Texture Lab, the Update Version 2.0 of the Sonicware SmpITrek is now available.

Features:

- Improved sampling workflow with presets
- Improved monitor function
- Real Time Recording - without quantisation or with high resolution.
- Enhanced Swing options
- Easy duplication, copying of drum, instrument or shot tracks
- Drum track settings for pitch
- Improved waveform display for global audio tracks and input level display
- Improved effects parameters for vinyl/cassette FX. Bitcrusher FX
