

Sonuscore CHROMA - UPRIGHT PIANO

Sonuscore, a company creating cinematic instruments, announces the release of the CHROMA - UPRIGHT PIANO Library, an extraordinary virtual instrument meticulously crafted for film composers and music producers. Combining rich history, meticulous restoration, this piano offers an emotionally resonant and versatile soundscape that stands out in any score. The journey of the CHROMA - UPRIGHT PIANO began in a small studio where the Sonuscore team was initially focused on recording a grand piano. However, an unassuming upright piano in the same studio captured their attention. Its distinct sound and emotional depth left a lasting impression, prompting the team to record and share its unique character with the world.

This upright piano is a century-old masterpiece from a small, renowned piano house. Lovingly restored with new strings, felts, and mechanics, it maintains its tune exceptionally well while preserving its authentic, vintage charm. This meticulous restoration, combined with Sonuscore's expertise in coding and sampling, has resulted in a classic piano with modern features.
