

STL ToneHub - Michael Britt Preset Pack Now Available

STL Tones releases Michael Britt guitar tone presets for the STL ToneHub platform on 12th February

After the release of STL ToneHub in March of 2020, featuring preset packs from some of the biggest names in the industry including David Bendeth, Howard Benson, John Feldmann, Will Putney and Josh Middleton (Architects) to name a few, STL Tones announces the official availability of an all-new guitar preset pack by legendary country guitarist Michael Britt, currently playing guitar in Lonestar.

Michael Britt is the guitarist for country group Lonestar. The group has had 9 x #1 songs and sold millions of albums worldwide. Britt has worked with many of the best musicians, writers, and producers in Nashville. Outside of Lonestar, Britt is perhaps the most well-known and respected commercial Kemper Profile sellers. We introduce to you the '2020 Pack' from Michael Britt, which is one of his most recent releases from his Kemper Profiles website. It contains some of Britt's all time favorite amps that cover all the "food groups". From the best vintage Plexi he has ever heard, to a couple of his favorite AC type circuits, to some classic CA tweed, blackface, and brownface tones, to unique amps that fall somewhere in between. The pack contains a total of 126 presets.

STL ToneHub - Michael Britt Preset Pack is available on February 12th for \$39.
