

Voxengo Soniformer 3.14

Voxengo Soniformer version 3.14 update is now available for download. Soniformer is a spectral mastering dynamics processor plugin for professional music production applications, available in AAX, AudioUnit, VST, and VST3 plugin formats, for macOS and Windows computers.

This version's changes:

- Added the "Spectrum, meter border" and "Panel border" palette modifiers, visual features. The "Flat Panels" global settings is now a part of color scheme's visual features.
- Updated all palettes, to reduce "border" contrast. An existing palette may need to be reloaded for the change to be visible.

Voxengo Soniformer 3.14 spectral mastering processor plugin released

Tuesday, 29 November 2022 15:50

- Improved knob's renderings.
- Made a small speed-up of GUI loading and drawing.
- Fixed an issue with popup-menus not functioning in Logic Pro on Apple M1 native.
- By frequent user request, the "Solo" switch's state is now saved together with the preset (a part of the routing parameters). While this opens up a possibility of leaving the "Solo" switch enabled and forgotten, this provides more flexibility, e.g. when mid/side processing is used.
- Implemented "Portable Setups" support (portable settings and authorization storage), read more in the Primary User Guide.

Every parameter in Soniformer is defined by means of a graphic envelope which is freely-modifiable and which may contain unlimited number of control points. Beside usual threshold, attack, release, and compression/expander ratio parameters, Soniformer offers you control over "stereo width" and "panning" parameters making Soniformer an effective tool for stereo field adjustments.

Soniformer features:

- Up to 64-band dynamics processor
- Envelope-driven parameters
- Up to 64-band "analog" spectrum analyzer
- Stereo balance and correlation meters
- Multi-band panning
- Narrow-band sweeping
- Stereo and multi-channel processing
- Internal channel routing
- Channel grouping
- Mid/side processing
- Up to 8x oversampling
- 64-bit floating point processing
- Preset manager
- Undo/redo history
- A/B comparisons
- Contextual hint messages
- All sample rates support
- 11 ms compensated processing latency
- Retina and HighDPI support

Demo version of Voxengo Soniformer and other pro audio plug-ins can be downloaded at the Voxengo web site.
