

Audio-Technica AT8175

Audio-Technica, an innovator in transducer technology for over 60 years, introduces the AT8175 Microphone Pop Filter. Designed for up-close use to assist in reducing excessive pressures on the microphone's element, the AT8175 is sleeker than standard pop filters and custom-designed to clip onto the front of A-T 20 Series side-address mics. Perfect for recording, podcasting or streaming applications, the AT8175 provides added protection against plosive consonants (such as "p's" and "b's," etc.), without any compromise to the audio quality.

The AT8175 is compatible with the following A-T 20 Series microphones:

Audio-Technica Introduces AT8175 Pop Filter for 20 Series Microphones

Wednesday, 01 February 2023 18:03

- AT2020 Cardioid Condenser Microphone
