

New Neon Drifts Expansion for Steinberg Retrologue 2

Steinberg today announced the immediate availability of Neon Drifts, a brand-new synthwave expansion pack for its powerful Retrologue 2 virtual analog synthesizer.

Together with dvCompTools, Steinberg has created a unique set of 150 presets for Retrologue 2. Neon Drifts adds an '80s touch to modern music productions, delivering more analog sounds, smooth arpeggios and dreamy pads to Retrologue's vast library.

"Retrologue 2 is a powerhouse of a synthesizer, and Neon Drifts is capable of harnessing this power to create vintage sounds with a modern touch. Users of Retrologue 2 reminiscing the 1980s within today's music productions will be keen to expand their sound portfolio with Neon Drifts right away," says Senior Marketing Manager Florian Haack.

Neon Drifts is exclusively available through the Steinberg Online Shop for 19.99 euros.
