

Slate Digital TH-U Slate Edition V2 Update

Slate Digital announces a major update to its TH-U Slate Edition amp modeling software. Proudly offered in partnership with Overloud, TH-U Slate Edition offers an exclusive collection of amps, cabinets, and effects that will have users reimagining their dream guitar tone. TH-U Slate Edition brings over 100 faithfully modeled amps, cabs and effects to the All Access Pass and Complete Access Bundle. With TH-U Slate Edition, users have 39 amps, 39 cabinets and 35 FX pedals and modules at their disposal with which to craft their sound.

Among the many incredible features that make TH-U stand out among comparable virtual amp modelers, this new update brings some long-awaited features to the software. In addition to 7 new amps, 4 new effects, new cabinets and over 1,700 new IR's, users also get to explore the highly customizable and interactive SuperCabinet Fluid IR processor, as well as a host of official IRs from Jensen. (Learn more about Fluid IR [here](#).)

Whether crafting new primary guitar or bass tones or experimenting with sound design and effects processing on various sound sources, TH-U Slate Edition is a doorway into an expansive world of sonic possibilities. This new update to TH-U Slate Edition is available now for All Access Pass and Complete Access Bundle subscribers.

The Slate Digital All Access Pass features dozens of award-winning plugins like MetaTune and Murda Melodies, in addition to third-party offerings from Kilohearts and Sonic Academy like Multipass and the ANA 2 Ultra Bundle. It also includes access to the VIRTU web-based assisted mastering platform, as well as hours of video masterclasses via Slate Academy, pro mix templates for all major DAWs, and over 20 GB of unique royalty-free samples.
